

DOMINANT & RECESSIVE INSTRUCTIONS

Please print and fill in completely. This form must be completed for you adult dogs registration.

The “DOMINANT” faults & virtues are visible traits. You should be able to look at your dog and see them. Please evaluate your dog honestly, this is important for the breed as a whole. If you are in doubt, the registrar, Judy Vaneman, will help you by looking at the clear photos that you send in of your dog for registration. Do not use just the number of the fault of virtue, please also make note of the description relating to your dog.

The “RECESSIVE” faults & virtues are hidden traits. Those should be given to you by your dog’s breeder.

Don’t be worried about listing any faults, this does not mean that your dog is not breeding or show quality; however, you should avoid breeding your dog to another with the same faults. Remember, as your dog matures after 12 months of age, some of the faults & virtues may change. Please let the registrar know that there have been changes so that the appropriate updates can be made on your dog at the registry.
